

## Lighted Forceps for Foreign Body Removal

The Bionix Lighted Forceps for foreign body removal is an innovative new tool that provides primary and acute care physicians with light and magnification in a small, single-use forceps for the ear and nose. The Lighted Forceps is an extension of the innovative, award winning Lighted Ear Curette with Magnification product line.

### Features and Benefits

- *Visualization – A brilliant white light projected to the tip of the forceps illuminating the orifice and the foreign body.*
- *Safety – Illumination and magnification improves procedural accuracy, avoiding the risk of injury from a blind procedure.*
- *Efficacy – Forceps open to accommodate object as large as 5 mm with gripper teeth for a secure hold.*
- *Simplicity – Simple spring grip design for easy, single handed operation.*
- *Convenience – Eliminates the need to use a separate light source or magnification device in an attempt to enhance visualization.*
- *Variety – Ideal for the nose or ear and a variety of foreign bodies.*
- *Made in the U.S.A.*
