seca
Precision for health

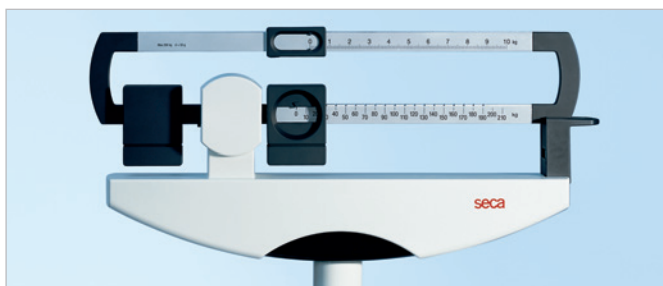

Designed to meet the highest demands

The seca 700 mechanical column scale with its eye-level balance beam sets new standards worldwide – for capacity, graduation and quality. The optional seca 220 measuring rod converts the scale into a complete space-saving measuring and weighing device.

seca 700 – mechanical column scales – designed to meet the highest demands

Maximum capacity, finest graduation

No mechanical column scale offers more capacity and precision. With a capacity of up to 220 kg or 500 lbs, the seca 700 makes it possible to weigh even very heavy patients. Surveys have confirmed that excess weight is one of the fastest growing health risks – so, with this scale, you are well prepared for the future. With the uniquely fine 50 g or 1/8 pound graduation you are also a large step ahead because, especially for children or dialysis patients, regular, precise weight control is indispensable.

Most stable quality for maximum durability

The base is made of cast iron; the solid iron column supports the compact, indestructible beam mechanism. The whole weighing mechanism is also well protected against corrosion.

Best ergonomic design

Like all seca scales, the seca 700 is also sophisticated in its ergonomic form and is perfectly designed to meet everyday demands. To make it particularly comfortable for patients and users, a great deal of care was taken to ensure that the seca 700 has no sharp edges or corners.

Easy to assemble

The seca 700 is assembled in next to no time with just three screws. With the seca 700, seca has succeeded in achieving the most compact packaging form of its class which, last but not least, helps to keep transport costs to a minimum.

Ease of use

The clear weighing result at eye level and the high-contrast scale with clear, easy to read figures ensure speedy and precise weight determination. Moreover, the reading scale is specially sealed and protected against wear. The zero point adjustment is protected against unintended shifting by a locking screw. Integrated transport castors mean that the seca 700 is easy to move around and can be used flexibly.

Large, safe platform

No other scale of this class has a larger platform. With this non-slip platform, the seca 700 makes the weighing process a safe one, also for larger patients. The platform is also very easy to mount as it is especially low.

Optional accessory: measuring rod seca 220

This makes the seca 700 a perfect space-saving weighing and measuring device for time-saving measuring and weighing in one process.

Technical data seca 700

Available as: kg, lbs or kg/lbs version

- Capacity: 220 kg, 500 lbs, 160 kg / 400 lbs
- Graduation: 50 g, 1/8 lbs, 100 g / 1/4 lbs
- Dimensions (WxHxD): 520 x 1556 x 519 mm / 20 1/2 x 61 1/4 x 20 1/2"
- Platform (WxHxD): 350 x 82 x 360 mm / 13 3/4 x 3 1/4 x 14 1/4"
- Weight: 23,5 kg / 51,8 lbs
- Optional: seca 220 measuring rod, measuring range 60 – 200 cm / 24 – 78" graduation 1 mm / 1/8"
